APPENDIX A – PROJECT LAYOUT PLAN

1.0 INTRODUCTION

This Part 4 – Request for Proposals Plan contains one Project layout plan to be used for the Project. The proposed Project Layout Plan contained herein shows the layout that defines the design-build project. This Plan is categorized as having both directive and indicative features.

2.0 DIRECTIVE AND INDICATIVE PLAN CATEGORIZATION

The Project layout plan is categorized as directive for the project limits, the minimum clearances shown, the number of mainline lanes to be provided and the locations where bridge structures are to be used.

The Project layout plan is categorized as indicative in all other aspects.

The Design-Builder shall use the Project Layout Plan to develop the final design of the proposed facility.

The Project layout plan may be modified as required by the Design-Builder's final design efforts. However, any changes to the Project layout plan that reduce capacity will require approval of the Louisiana Department of Transportation and Development.
